### Conditions of delivery

- Materials must be packaged and delivered in such a way that no dangerous situations can arise during the unloading of a cargo. Freights with incorrectly stacked pallets may be refused.
- Materials must be supplied in such a way that damage to devices with a battery or accumulator is prevented.
- Sorted material, on pallets, in big bags or IBC containers must be delivered in a closed trailer, tilt trailer or walking floor.
- Costs related to delays, work and the removal of certain waste, related to incorrectly supplied material, will be charged to the supplier.
